

# JR Mobile Marine

## *Your Full-Service Marine Facility*

5 January 2008

To Whom It May Concern:

J.R. Mobile Marine services over 750 boats on a yearly basis from our facility which is adjacent to a large marina.

We were made aware of EngineCheckUp while attending the NMMA trade show in Las Vegas in July of 2007. Shortly thereafter, we purchased several EngineCheckUp kits for testing.

We were extremely impressed with our initial results. The test clearly showed problems that would not have easily been identified without disassembly of at least the upper engine.

In September we made a commitment to include an EngineCheckUp as part of our ongoing maintenance program with all our customers. From routine oil changes to winterizing, all engines have the EngineCheckUp performed before and after maintenance.

We have completed over 1,200 tests. We have had no resistance from our customers whatsoever. As our customers have become more aware of the product, it is routinely asked for. We include testing generators and ancillary equipment as part of our program.

EngineCheckUp has been a good revenue source for us – not only do we profit from taking the test, we also increase our business to customers repairing problems exposed.

If there are any questions regarding the above, please do not hesitate to contact me at my company number.

Sincerely,

Jim Rowehl  
Owner
